PHYSICS LECTURE SERIES

LECTURE BY V.G.JOSHI

14-02-2019

It is vital to remain up to date with current technologies in today's world, which is why our university hosts a variety of seminars and talks on many topics. One of them was the college's Physics department's seminar on 'ADVANCES IN ELECTRONICS.' Dr. V.G.Joshi, who has been working as a professor in physics at the university, was the guest speaker. He shared his knowledge with our students and informed them about Electronics , which will be very useful to them in future research and technological growth.
