LECTURE on “CROP BIODIVERSITY FOR CLIMATE RESILIENT AGRICULTURE”

BY
Prof. VIPULBHAI SOMANI

3-2-2020

Every year the institution organizes different seminars, workshops, lectures etc in different fields in college. For that experts are invited and they share their immense knowledge with the students as well as the faculties. Among these, one lecture series has been organized by the Biology Department of the college under the umbrella of College Expansion Lecture Series on the Topic, ‘Crop Biodiversity For Climate Resilient Agriculture’. For that the eminent experts Prof. Vipulbhai Somani was invited who is working as the head at VNSGU– Surat. He has shared his knowledge related to crop biodiversity which has been changing according to the climate. This was a very helpful lecture for the students who want to pursue their career in the field of agriculture. Through such lectures the institution is providing a good platform for the students to make their learning easy and interesting.

J. Somani
