નિર્માણ સાધારણ નિર્માણ થિયા.

* FTIR, Gas Chromatography, NMR, I.R. નિર્માણ વિભાગ
polymer ની Testing, by synthesis changing functional
group ના polymer property change કરી શક્યા.

* P.C. in poly. chem. Research programme for Ph.D. 451
લાંબું રહેતું.

* સાધ્યોની National Level ની નેટવર્ક, ગુજરાત, ઓડિશા,
ଓડિશા, પ્રદીપ, ઓડા જાહેરી થિયા.

* National Level ની polymer ની manufacture કરી શકી છી
60 %. ની ગુરુત્વાની રીતથી.

* OLC — ઝાંખું નેરી, ઝાંખું, પ્રેરણ, હરિયાલી, કાંઠાંદી, M.P. નેરાંદી, હનુમાં
નાંદી, કાંઠાંદી, ન. ગોંડા.

* R&D. Wing - APDDL - Bengaluru
ARSTPS - Chennai

* Specialized Technology Centres.

- B.Tech in Pla. Tech.

- P.C. Diploma in Plastic Processing & Testing (PCD-PPT) (1½ years)

- Post Diploma in PlasticMold Design & Operation.

Carrer Guidance Seminar For B.Sc.- Chemistry Students

Ploymer Chemistry

Date : 19.01.2017

Now a days the polymers of different types are synthesized in the polymer industry for various purposes and for various applications.

This is the era of polymers which have the applications in textiles, pharmacy , petrochemicals, agrochemicals , pesticides , insecticides, herbicides ,explosives, ceramic industries , glass , paper, cement, perfumes and cosmetic industries

It was thought interesting to organize a lecture for the prospects of a B.Sc. & M.Sc. chemistry graduate in polymer science and polymer applications. With a view to make the student familiar about the various institutes, providing the knowledge and the teaching facilities in the field of polymers, The department invited a guest talk on polymer education invited the faculties from Central Institute of Plastic Engineering & Technology (CIPET). Two faculties from CIPET gave the lectures on academic values, Technology support and the research done in department of chemicals and petro chemicals, Ministry of Chemicals & Fertilizers, Government of India. Mr. Paritosh P. Diwasali , Sr. Technical Officer from CIPET explained the prospects of polymer chemistry after passing B.Sc.

and TLC . The testing of polymers, by changing functional group in the synthesis of polymer how the properties are changed, that was explained very nicely. The availability of P.G. courses in polymer chemistry and the research programme was also explained to the students.

The network of CIPET throughout the country in the states like Gujarat, Tamilnadu, U.P., Bihar, Delhi, Kerala has been established. Students came to know about R & D wing – APDDRL – Bengaluru and ARSTPS- Chennai are the main centers CIPET run by Ministry of Chemical And Fertilizers, Government of India.

The specialized technical centers are also run by Government of India. The information about B.Tech. in plastic Technology , P.G. Diploma in plastic processing and testing (PGD-PPT I.5 years), Post Diploma in Plastic Mould Design (PD-PMT 3 years) , Diploma in Plastic Technology (1.5 years). These courses are useful for the student seeking to make career in plastic industry. It was very highly informative and useful lectures for the B.Sc. and the M.Sc. students. About 150 students were present in the lectures.

The principal Dr. V. A. Desai introduces Mr. Paritosh Diwasali and welcomed in the college for the lecture. Head Dr. J.M.Desai gave a vote of thanks. Dr. V.A. Champaneri conducted the event.

Project Frame by Chemistry Department

Year: 2016-17

Activity: Lecture of Polymer Chemistry

shri Paritosh P. Diwasali, senior Technical officer
CIPET

Co-ordinator: DR. V. A. Champaneri

Student Strength: 150

Student Class: B. Sc. and M. Sc.

Faculty: _____

Date: 19 - XI - 2017
