ECO CLUB TOUR

WAGHAI- AHWA- SAMGAHAN- SAPUTARA TOUR

Date:3-9-2017

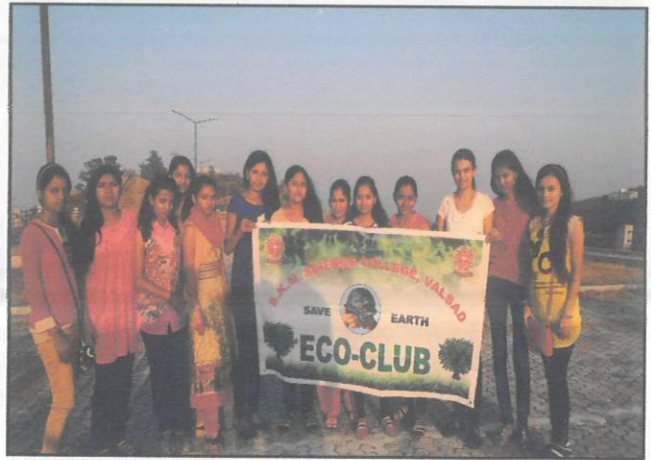

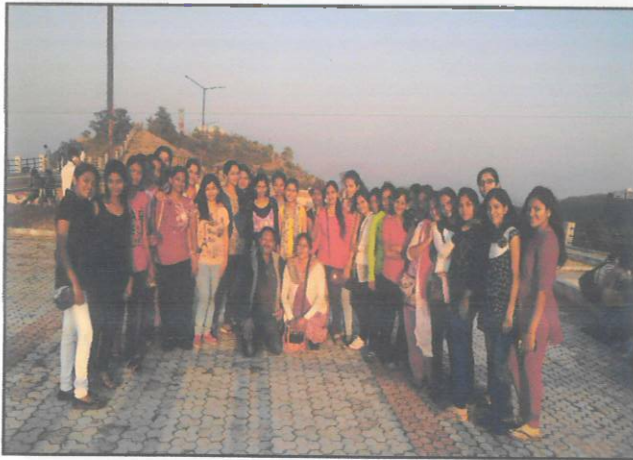

With great respect and regards, I would like to bring to your inform you that on 3rd September,2017; a tour was organized by Dr Dilip Kumar Dhirubhai Patel, Professor of Biology department and chairman of eco club along with 50 students. We started our journey from Kalyan Bagh, Valsad and took our first halt at WAGHAI- BOTANICAL GARDEN. We witnessed a wide variety of plants species such as Sterculia urena, Tectona grandia, Dalbergia latifolia, Terminalia tomentosa which is also include included in the T.Y B.Sc and M.Sc syllabus. The garden also had medicinal garden and cactus house the medicinal garden also had a wide variety of plants such as Withania somnifera, Terminalia arjuna, Hemidesmus indicus and many more varieties. after weaknessing these medicinal plants in the garden, the students were taken to Ahwa at around 11:00am.The students also got a chance to do trekking and also gained knowledge about various plants. The students also enjoyed boating and also visited the Saputara museum. In the evening, we returned back to Valsad .

In this educational tour, the students got a chance to know different types of plants as well as also got a chance to enjoy nature .In this tour, the students also learnt the importance of plant cultivation and the maintenance and importance of nature.
